SCOUTS VISIT MOUNT VERNON

Gettysburg Boy Scouts Visited Old Home of Washington. Inspect Many articles of Interest. Enjoy Trip on Potomac.

(Special to The Times)

Washington, D. C., June 14—Tuesday morning was spent by the Gettysburg Boy Scouts on the Mount Vernon trip. The journey down the Potomac was an innovation which was greatly enjoyed by the Gettysburg boys and they were as enthusiastic over that portion of the present outing as anything they have yet done.

Mount Vernon's various spots of interest were eagerly sought. The room in which Washington died pleased the boys especially while that in which Martha Washington passed her last hours came in for its share of attention. The old family carriage, and the cushions, slippers, chairs, swords, dresses, tables and utensils which fill the place, each with its special interest as having belonged to Washington and his family, were all viewed with great eagerness by the youthful sightseers. All the rooms are as they were in Washington's time.

The gifts from Lafayette to Washington were almost as interesting to the boys as the other things in the house. The tomb of Washington and his wife was visited before starting on the return, which was reluctantly begun after one of the most pleasantly instructive days since the Scouts left Gettysburg one week ago.

Upon the return to the Capitol City the boys all went up to the Y. M. C. A. for their daily swim.

Even in this big city the Gettysburg boys arouse great interest.

The newspapers are showing them special attention and one of the papers had Carroll McDonnell come to their office to have his photograph taken, holding the cane which he is to present to President Taft this afternoon. This is the big event of the trip and one which has been looked forward to eagerly ever since the start. A visit to the house where Lincoln died was scheduled for this morning.

One of the events which has caused amusement among the Scouts happened at the Capitol on Monday. When the whole bunch crowded into an elevator it started dropping and the operator had to quickly put on the brake and ask a few of the Scouts to get out. Since then the boys have dubbed themselves "the Gettysburg heavyweights."

MORE BOUQUETS

Plank pitched for the Athletic on Tuesday and his team won from St. Louis giving the Quaker City papers an opportunity to pass the Gettysburg boy the following:

Record: "Eddie Plank had the Browns so bewildered that they couldn't put one and one together in any one inning until after two were down and the additions then wouldn't add anything to the run column."

Press: "Veteran Eddie Plank yesterday pushed the World Champion Athletics a round nearer the top of the American League pennant ladder by shutting out the St. Louis Browns at Shibe Park by a score of 6 to 0. It made the Athletics' third straight victory over the Browns here and the eighteenth win for the Champions in twenty games just completed."

Inquirer: "Edward Plank, of Gettysburg, Pa. was assigned by the local tactician to go out on the pitcher's mound and accept another gift from the philanthropists of the American League to add to his collection in the official records, while Joe Lake was selected as the goat to stand for another defeat. It would be a libel to call it pitching a ball game; there was no chance for it to develop into a ball game, and everybody knew it. Plank fanned ten of the philanthropists during the perfunctory performance, and the only times he gave 'em a chance to scare up even a fleeting hope for a run was when he felt in the mood to show leniency toward the public and give them a run for their money. Then he would throw on the air brake and the safety clutch and bring the thing to a dead stop. There was nothing to it."

GEORGE L. WIEST

George L. Wiest, senior member of the firm of P. Wiest & Sons, proprietors of York's largest department store, died Monday morning at 6 o'clock at his home. Mr. Wiest was in apparent good health Monday and attended to his duties at the store during the day. He was one of the most prominent business men in York and had been in the dry goods business all his life.

LOST: diamond ring at Hotel Gettysburg. Five dollars reward if returned to Faber's Cigar Store, Centre Square.

A dance and picnic will be held at Virginia Mills on Saturday, June 17th, 1911.

PRETTY WEDDING AT BIGLERVILLE

Miss Margaret Koser, of Biglerville, and T. B. Edgar McLure, of St. Louis, Married at Bride's Home. Pretty Wedding.

An exceptionally pretty wedding took place at noon today at the home of Mr. and Mrs. G. W. Koser in Biglerville when their daughter, Miss Margaret J. Koser and Mr. T. B. Edgar McLure, of St. Louis, Missouri, were married, Rev. D. W. Woods, of Gettysburg, performing the ceremony.

A color scheme of green and white was beautifully carried out in the decorations, which were by Robbins of Carlisle, and in the gowns. The living room in which the ceremony was performed was decorated with a profusion of ferns and cut flowers.

The Germania Orchestra of Carlisle played the Lohengrin march as the wedding party descended the main staircase into the hall and from there entered the living room through an aisle formed by ribbons held by the ushers, Charles B. McLure, Jr., of St. Louis; Roswell Duty, of Millintown; Adam Hitchens, of Frostburg, Maryland, and Maurice S. Weaver, of Gettysburg.

Rev. Mr. Woods preceded the bridal party and was followed by the bridesmaids, Miss Marian McLure, of St. Louis, Missouri, and Miss Katharine Duncan, of Gettysburg; Miss Clara McLure, of St. Louis, and Miss Frances Sloan, of Cumberland, Maryland. They wore gowns of white marquisette over green messaline and poke bonnets of white lace over green. They carried marguerites. Miss Blanche Klinger, of Gettysburg, the maid of honor, followed the bridesmaids. She wore a gown of green messaline, trimmed with white net and pale pink roses, and a pink picture hat. Miss Klinger carried pale pink roses. The bride followed with her father. She wore a handsome gown of white satin trimmed in lace, pearls and hand embroidery. She wore a veil of white tulle with pearls and orange blossoms and carried a shower bouquet of bride's roses and lilies of the valley.

They were met by the groom with William R. McLure, of Philadelphia, Montana, who was the best man. The ring ceremony was used.

The presents were unusually numerous and handsome. The gift of the groom to the bride was a cross of rubies.

During the afternoon Mr. and Mrs. McLure went by automobile to Harrisburg. The bride wore a tailored traveling suit of brown serge and a green and brown poke bonnet. From Harrisburg they left for St. Louis where they will remain at Mr. McLure's home for two weeks before proceeding to Virginia City, Montana, where they will reside. Mr. McLure is a mining engineer and will be engaged in that profession at Virginia City.

The wedding was attended by a large number of guests among whom were C. B. McLure, of St. Louis, and Mr. and Mrs. Phineas Janney, of Lincoln, Virginia.

LOOK OUT FOR THEM

A report has come to Chambersburg two Jews have swindled a number of persons in different parts of Antim township, who are now willing to pay a reward for their apprehension. The Jews say they are buying antique furniture, dishes and other old relics. They principally devoted their schemes upon those persons who were in possession of valuable antique furniture and would not sell at any price, by offering them money to get the design, saying they were from that Chambersburg and were making new furniture over the old patterns and that they would return their furniture in a few days. The parties who trusted the Jews with their relics have made an investigation and have found that they have been duped. Some of the relics were very valuable and the owners would not part with them for any consideration. The whereabouts of the swindlers are not known.—Chambersburg Valley Spirit.

EVERHART-MCCARNEY

Curtis Everhart and Miss Edna McCarney, both of Gettysburg, were married in Harrisburg Monday afternoon. They returned to Gettysburg on Tuesday evening. Mr. Everhart is employed with the Ice and Storage Company and Mrs. Everhart had been with Seligman and McIlhenny for some time.

FOUND THROUGH AD

The brown bag lost and advertised for through these columns has been found through the ad.

MARCH crop of cherries. One hundred bushels shipped out of Biglerville Tuesday. Rice Brothers Produce Company sent out fifty two bushels and paid eight cents a quart.

WILL PLAY TWO SERIES OF GAMES

Gettysburg Young Men's Christian Association Base Ball Team will Play Series with Hanover and York Springs. Gettysburg Day.

The Gettysburg Y. M. C. A. base ball team has been practicing regularly for the games which have been arranged for the next few weeks. Others will also be scheduled as the season progresses.

Two series of games have been arranged, the one with Hanover and the other with York Springs. The first game with Hanover will be played at that place June 17, the second here on June 22, and the third at Hanover June 28. "Gettysburg day" at Hanover and a special excursion train will be run in the evening to bring the people back providing enough can be secured to guarantee the necessary number. The attractions at the park will all be in full swing and efforts to make it a town outing are in progress.

The series with York Springs will start here on July 12. The second game will be played at York Springs on July 15 and the third game will be played on July 26, the place not yet determined upon.

A game has been arranged to be played here with Rutherford on July 7. Emmitsburg will play here within a week or two but this date has not yet been closed.

The local team has made a good showing up to this time and indications are that the balance of the season will see a large proportion of victories.

ROYAL ARCANUM PICNIC

A delegation of Gettysburg members will attend the next meeting of the Associated Councils of the Royal Arcanum of Central Pennsylvania at Mt. Holly park, Cumberland county, near Carlisle, Thursday afternoon, June 22, at 4.30 o'clock. This will be marked by a celebration of the birthday of the Royal Arcanum which was founded June 23, 1877.

There will be a good old fashioned basket picnic, while the attractions of the entertainment will be boating, bowling, dancing, various games and walking and running contests, all of which will be free to members of the Royal Arcanum and their families.

Then there will be a meeting of the executive committee of the Grand Council at 2 p. m., at the Royal Arcanum headquarters in Carlisle and at 4.30 the members will join the picnickers at the park. The grand trustees and many other distinguished Pennsylvania Arcanians will be in attendance, while the new supreme regent, the Rev. F. T. McFadden, D. D., will be the honored guest.

At a regular meeting of the Gettysburg Council of the Royal Arcanum No. 1608, John D. Keith, George W. Reigle, and William F. Codori were elected to become members and the degree in due form was conferred upon them. Jacob G. Slonaker, regent, Edward A. Weaver, secretary, J. Elmer Musselman, treasurer, William A. Taughinbaugh, collector, William Hersh, Esq., acting orator, and George Gottwald, warden, officiated.

RECOVERING

Harry Hoffman, son of Mr. and Mrs. Henry Hoffman, who was knocked down and badly injured by an automobile near the reservoir at York several weeks ago, is rapidly recovering. The dislocation and broken bones in his shoulder, and all of the cuts and bruises on his body, have healed. The broken bones in his leg are knitting nicely and except for an open sore on the leg where the bones were broken, he no longer has any outward marks of his injuries. It is expected that he will be able to get about on crutches in a week or so, his leg being encased in a plaster cast.

WILLIAM J. COLLINS

William J. Collins died on Monday afternoon in Mt. Joy township from effects of pneumonia contracted in January, never having fully recovered. He was about 58 years of age. He enjoyed the respect of every one who knew him. He leaves a wife one son and two daughters, L. U. Collins, of Mt. Joy; Mrs. Clarence Wolf and Miss Bessie Collins, at home. He is survived by two brothers and two sisters: ex-Prothonotary Amos J. Collins, of this place; C. C. Collins, of Mt. Joy; Mrs. H. Bucher, of Gettysburg, and Mrs. J. F. Rider, of Cumberland township. Funeral Thursday at 9.30 a. m. Services will be conducted by Rev. Dr. T. J. Barkley, at St. Mark's church.

RICE BROTHERS Produce Company are paying highest prices for cherries and poultry.

WANTED: Lot fresh eggs, 15 cent a dozen. Trostel's Store, Arendtsville, Pa.

PERSONAL NOTES AND BRIEF ITEMS

Paragraphs of News Telling of the Happenings in and about Town. People Visiting here and those Sojourning Elsewhere.

Mrs. George Diller, of Hanover street, is visiting her sister in East Berlin.

Miss Eula Lee Waters, who spent her season with Miss Anna Reck as head trimmer, has returned to her home in North Carolina.

Mr. and Mrs. Norman S. Heindel, of Carlisle street, are visiting in Baltimore for several days.

J. McCrea Dickson returned today to Philadelphia where he will spend the next month.

Charles A. Hawkins, a York lawyer well known here, has closed his office in that city, and has gone to his farm in Peach Bottom township, where he will engage in the practice of law and enjoy the pleasures of country life. Mr. Hawkins has a large clientele in the southern part of the county. He has fitted up a law office in his country home.

Mr. and Mrs. Wilmer W. Hoopes, of Paoli, the Misses Lippincott, of Cheltenham Hills and Edward W. Blatchford, of Chicago, are registered at the Eagle.

The following from Gettysburg attended the wedding of Miss Vivian Gilbert and Max West in Chambersburg today. Major and Mrs. Charles E. Gilbert, Mr. and Mrs. Rufus Bushman, Mrs. George McClellan, Mr. and Mrs. J. Warren Gilbert, Harry Gilbert and Miss Rosellen Gilbert.

Elliott Valentine has gone to Asbury Park to spend the summer months.

Edgar Deardorff has returned from a trip of several days to Philadelphia.

Mrs. Danner Buehler and daughter Mary Jane, are visiting for several days at Mrs. Buehler's home at Foltz, Franklin county.

Miss Anna Hollebaugh returned home this morning after a trip of several days to Hanover.

Miss Mary Duttera, of Baltimore street, is spending several days with Miss Barbara Koons, in Baltimore.

Mrs. Joseph Hemler has returned to her home in Hanover after spending a few days with Mrs. W. D. McSherry on East Middle street.

Miss Mabel Myers has returned home after spending some time in Baltimore.

Miss Louise Giveler, of York, is visiting friends in Gettysburg, for a few weeks.

LOST HANDSOME RING

Baltimore street this morning looked as one might expect to find it on a winter day when the pavements are covered with ice. About two thirds of the pedestrians took to the middle of the road and all because of a lost \$185 diamond ring. The owner, Mrs. Edward Faber, of Williamsport, was one of an automobile party who stopped at the Hotel Gettysburg Tuesday night. This morning when the machine had reached the Battlefield Hotel the ring was missed and it was believed to have been dropped somewhere between the two hotels. A reward of \$5.00 was immediately offered and this was increased by rumor to \$25.00. A large searching party immediately started to patrol the street but nothing was found of the missing property. Mr. and Mrs. Faber have a number of relatives here.

MOVABLE CONVENTION

A "movable" convention of the Harrisburg District Epworth League, will be held during the week in the Cumberland Valley. The first session will open Waynesboro Thursday, June 15, at 1.30 p. m. In the evening at 7.30 Rev. Joseph M. M. Gray, will deliver a lecture. The devotional exercises will be conducted by Rev. Joseph V. Adams, pastor of the Hanover Methodist church. Following the session Friday morning, the convention will adjourn to Pen Mar, where exercises will be held in the big auditorium at 2 and 7.30 p. m. The meetings will be addressed by Bishop Anderson. The convention music will be in charge of Rev. and Mrs. D. N. Miller, of Montoursville.

William R. Schmucker, of Littlestown, is president of the Epworth League, and assisted in arranging the program for the convention.

PREACHING ON THE SQUARE

A traveling evangelistic party in a large automobile which had the rear part arranged like a gypsy wagon spent an hour on the Square Tuesday afternoon and again in the evening. The preaching was of the usual street evangelist kind, and the singing was typical also.

FOR SALE: one six foot McCormick binder, cheap. Has cut only sixty acres. Apply at Times office.

LETTERS FROM COUNTY TOWNS

Correspondents send in Many Items of Interesting News from their Respective Towns. Personals and Many Brief Items.

McSHERRYSTOWN

McSherrystown, June 14—F. A. Klunk, of Baltimore, is visiting Mrs. Catharine Klunk, of Main street.

Rt. Rev. John W. Shannahan, Bishop of the Harrisburg diocese, was the guest of Rev. L. Aug. Reudter, of St. Mary's Catholic Church Tuesday.

FLAG DAY TODAY.

134th Anniversary of Adoption
of American Flag.

COMMENCEMENT AT LEHIGH

Highest Honor Prize Is Won by a Chinaman.

Bethlehem, Pa., June 14. — Commencement day exercises at Lehigh university were held in Packer Memorial church.

Eighty-two young men received diplomas and degrees, mostly in technical pursuits, at the hands of the institution's president, Dr. H. S. Drinker, who is this year celebrating his fortieth year of graduation from Lehigh.

To a Chinaman has fallen the highest honor prize of the year. The Celestial, Chinmin Chu Fuh, of Nan Ziang Kiang Su, China, is a sophomore, and he captured the Wilbur \$200 scholarship.

The annual alumni graduation address was delivered by Dr. Talmadge, of Salt Lake City.

STOPS TRAIN AND SAVES DROWNING BOY

Brakeman Plunges Into River and Rescues Lad.

Wilkes-Barre, Pa., June 14.—Stopping the train when he saw a small boy drowning in the Susquehanna river, Fred Stoker, a Delaware, Lackawanna & Western work train brakeman, jumped from the train, plunged into the river and rescued the boy.

The youngster, a boy of about ten years, had gone in bathing alone and the current of the river, which had been swollen by recent rains, seized him and swept him away.

Stoker heard his cries for help as the train approached him and told the engineer to put on speed and run to a point ahead of the boy. There was a lively race for a minute, and when some twenty-five yards ahead of the boy Stoker jumped off and plunged in and got the boy to shore after a struggle. The lad was soon revived.

TAFT HONORS SIX SAILORS

Cabinet Waits While He Presents Medals to Heroes of North Dakota.

Washington, June 14.—The cabinet kept waiting while President Taft presented six enlisted men of the navy with medals of honor, the highest distinction the government can bestow.

The president spoke in praise of their heroic deeds when, on Sept. 8, 1910, an oil fuel explosion on the North Dakota killed three men, put in jeopardy the lives of scores of others and placed the battleship itself in danger.

Thomas Stanton and Patrick Westa, chief machinist's mates; Patrick Reid and August Holtz, chief water tenders; Charles C. Roberts, machinist's mate, first class, and Harry Lipscomb, water tender, made up the honored half dozen.

These men waded in water up to their waists in dense smoke, unbearable heat and the fumes of burning oil and gas and steam, to rescue their comrades and to prevent further explosions.

"Affinities" Preacher's Undoing.

Pittsburg, June 14.—Rev. Dr. Walter E. Price, pastor of the exclusive McKeesport First Presbyterian church, was ousted from his charge by orders of the Red Stone Presbytery. Dr. Price, who was one of the most prominent ministers in western Pennsylvania, was reported to have had "affinities" among the young society girls of his congregation. He is married and has a family.

STEEL TRUST PUT END TO POOLS

Gayley Says Fines Were Imposed to Enforce Pact.

BIG MEN TO TESTIFY

Former President Roosevelt and J. P. Morgan to Be Asked to Appear Before Committee Investigating the Corporation.

Washington, June 14. — What amounted to an announcement that Theodore Roosevelt and J. P. Morgan would be asked to appear before the house committee which is investigating the United States Steel corporation was made by Representative Stanley, of Kentucky, chairman of the committee.

"This committee is anxious in the most positive way to ascertain the whole truth relative to the operations of this steel corporation," said Chairman Stanley. "The chairman of this committee, with perfect deference to high and low, will summon the president of the United States and J. P. Morgan in an effort to get at the facts."

"You mean the former president of the United States, do you not?" suggested Representative Littleton, of New York.

Won't Subpoena Them.

"I do," replied Mr. Stanley, who added that if the committee desired their presence they would ask Messrs. Roosevelt and Morgan to appear in stead of subpoenaing them.

If Colonel Roosevelt is called before the committee he will be questioned relative to his knowledge of the transaction by which the steel corporation acquired a controlling interest in the stock of the Tennessee Coal and Iron company.

Indications are that Mr. Morgan will not be invited to appear before the committee until early in the fall, upon his return from Europe. At that time Andrew Carnegie will be heard.

Two witnesses appeared before the committee. They were James Gayley, a former vice president of the steel corporation, and Frank P. Kellogg, who represented the government in the Standard Oil case. Mr. Gayley's testimony covered a wide range of the affairs of the corporation. He was questioned about the Gary dinners, the company's available supplies of ore and the conduct of its railroads.

Mr. Gayley denied that combinations or agreements existed in the steel trade today. Although at first he opposed the plan, he now thoroughly approved of the understandings reached between steel manufacturers at the conference dinners inaugurated by Judge E. H. Gary, head of the corporation.

Mr. Gayley said that prior to 1901 there were agreements by which manufacturers were apportioned certain shares of the steel business and those who failed to get their allotted share were taken care of with a proportion of the general profits.

Questioned by Representative Young, of Michigan, Mr. Gayley declared that for a long time before 1897 the price of steel rails was practically uniform at \$28 a ton. It represented, he said, an understanding between manufacturers of rails and the railroads as to an equitable price.

He said a fraternal feeling had always existed between rail makers because of a desire to produce the best possible rails.

Fines For Breaking Pacts.

He also admitted that previous to 1900 agreements were made between the various manufacturers regarding other steel products, in which the Carnegie company participated. These agreements provided fines for violations.

"What body imposed the fines?" Mr. Young asked. "I do not know," Mr. Gayley replied.

"To whom were the fines paid?" "I imagine that they were divided pro rata among the different companies."

When asked who could explain the agreements and fines, Mr. Gayley said he presumed Charles M. Schwab, the president, or E. A. Peacock, the vice president of the Carnegie company, could tell.

Plan Airship Flight to Pike's Peak.

Colorado Springs, Colo., June 14.—Plans for an aviation meet were completed here when a contract was signed between the Wright brothers and the committee in charge of the carnival to be held in August to commemorate the thirty-fifth anniversary of the admission of Colorado into the Union and the fortieth anniversary of the founding of Colorado Springs. The flights will be made Aug. 2 and 3. Colorado Springs is 6000 feet above sea level. If preliminary tests prove successful, attempts will probably be made to reach the summit of Pike's Peak, an altitude of over 14,000 feet.

Two Drowned Trying to Save Girl.

San Antonio, Tex., June 14. — Mrs. Lottie Noah, her daughter and her sister, Jennie Ellis, were drowned in a creek near Bandera. The first named two were endeavoring to rescue the Ellis girl, who had gotten beyond her depth while bathing.

MAN DEAD, WIFE ARRESTED

Woman Plunged a Fork Into His Breast.

Easton, Pa., June 14.—Mrs. Julia Glucioz is under arrest for having killed her husband, Joseph Glucioz, near Bath, Northampton county.

The woman and her nineteen-year-old son say that Glucioz attacked her and knocked her down while she was preparing supper, and not until then did she attempt to defend herself. Grabbing a fork from the table, she plunged the prongs deep into the man's breast, puncturing the lung. Glucioz died ten minutes later.

Meet and Marry in Two Hours.

Atlantic City, June 14.—Miss Besse Catherine Parker, eighteen years old, and Charles Russell Meserole were introduced to each other at 8 o'clock Tuesday evening. A half hour later young Meserole had proposed and was accepted. At 10 o'clock they were married by Squire Weeks. Their parents forgave them.

Canadian Premier Ill.

London, June 14.—Contrary to the advice of his physician, Sir Wilfrid Laurier, the Canadian premier, attended the meeting of the imperial conference. Sir Wilfrid has been suffering from slight throat trouble for several days.

TEACHERS TAKE SUMMER COURSE

Many Register at University of Pennsylvania.

TERM IS SIX WEEKS

Every Branch of Knowledge Covered. Up-to-Date Model School—Women to Use Dormitories and Swimming Pool—Scholarships Offered.

School teachers from nearly every county in the state are registering for the coming session of the Summer School of the University of Pennsylvania. The term will begin on July 5 and will continue for six weeks until August 16. Lectures upon almost every branch of knowledge, together with excursions about Philadelphia and social entertainments of various kinds, will combine to make a pleasant vacation for the students.

The feature which is attracting the greatest number of persons is the School of Observation. This is a model school which will be conducted by sixteen of the most expert teachers in the United States. These instructors have been selected from the cities throughout the country which are believed to have the finest systems of public education. The model school will have eight grades, two of which will be ungraded. There will be a teacher in charge of each of the grades, while the eight other teachers will demonstrate how children should be taught music, gymnastics, swimming, gardening and industrial work.

For Rural Teachers. Special attention will be paid to the ungraded work, which will be conducted with a view to helping the teachers in the rural districts solve some of the problems which confront them. The famous Batavia system of individual instruction will also be illustrated by an exponent of that method. About 200 children will act as the pupils for the model school, which is located on the edge of the university campus. The sessions of the school will be from nine until half past eleven every morning. During this time the regular primary and grammar school branches will be taught the children, together with a half hour of organized play and physical exercise.

For the remainder of the day the men and women who register in the Summer School will be able to pursue their favorite lines of study. There is no prescribed work. The teachers will be permitted to do just as much or as little as they like.

The courses in psychology are expected to be the most popular. There are thirteen of these, a majority of which have to do with the study of the child. An exhibition class of twenty backward children will be taught by Miss Elizabeth Farrell, inspector of ungraded classes in New York city. She will show how the incorrigible, stupid and retarded boys and girls who visit the psychological clinic of the university may be educated. Another of the courses in psychology is that in educational psychology which considers the development of the child from the germ cell to the age of fourteen years and discusses the influences of heredity, environment and disease.

Special Gymnasium Work.

The university gymnasium will be thrown open to the students in the Summer School. A corps of doctors, professors and instructors will deliver lectures and illustrate methods of physical training which will enable the students to qualify as physical directors. Both men and women are registering for this course. During certain hours the university swimming pool will be reserved exclusively for the women.

An abundance of courses is offered in all of the modern and ancient languages, in history, the fine arts, in sociology, economics, the sciences and architecture. In addition the students will find plenty of opportunity for social pleasures. Popular lectures, receptions, teas and excursions through Philadelphia and the vicinity will contribute to the amusement and recreation of men and women alike. Trips also will be taken in connection with some of the courses, as in physical and commercial geography and botany.

The students in geography will visit the wharves and docks of Philadelphia and will be given in this way an idea of the vast shipping interests of the state. They will also inspect representative manufactures in and about the city. Those who take the course in botany will not only make excursions to the haunts of the various local wild flowers, but will also have the use of the botanic gardens and the hot houses of the university, in which grow every species of plant.

Two of the best houses in the dormitory system have been reserved for the women. In charge of these will be responsible chaperons. The houses will be separated from those occupied by the men by the entire length of the system. A large reception room in one of the dormitory houses will furnish a social center for the students.

Through the agency of the Mothers' Congress, the Christian Temperance Union and other organizations, a number of scholarships to the Summer School have been provided. Teachers throughout the state will be eligible for these scholarships. The director of the Summer School is Dr. A. Duran Yocum, professor of pedagogy.

SAGE AND SULPHUR CURES DANDRUFF

Restores Faded and Gray Hair to Natural Color—Itching Scalp Quickly Stopped.

This applies to Wyeth's Sage and Sulphur Hair Remedy, for if it does not do exactly what is claimed for it, the sales would naturally drop off. However, Wyeth's Sage and Sulphur Hair Remedy does "make good," as evidenced by its daily increasing sales. Druggists say that this preparation gives the best satisfaction of any hair remedy ever sold. Wyeth's Sage and Sulphur is clean and wholesome and perfectly harmless. It removes dandruff, strengthens the hair, gives new life to dull or parched hair, and gradually restores gray hair to natural color.

This preparation is offered to the public at fifty cents a bottle, and is recommended and sold by all druggists. For Sale by the People's Drug Store Gettysburg, Pa.

Dandruff Vanishes

Falling Hair Ends and Hair Grows Profusely

Your money back if Parisian Sage isn't the best hair tonic—the best hair grower—the best hair saver—you ever used, you be the judge. Ask People's Drug Store. It's really a wonder what a phenomenal sale Parisian Sage has made for itself in America in a few years. And what a multitude of people have been cured of falling hair, dandruff and itching scalp by its use.

And now the American women praise Parisian Sage for its peculiar ability to turn harsh, faded, lustless hair into fresh, beautiful, silky and lustrous hair in a few days.

Parisian Sage is to-day the favorite hair dressing and tonic of discriminating Americans, because it is the only hair grower that will do just as it is advertised to do, or money back.

It kills the dandruff germ and cures dandruff, stops falling hair and itching scalp in two weeks. If it doesn't People's Drug Store and druggists everywhere will give you your money back.

If you haven't tried Parisian Sage, get a large 50 cent bottle to-day.

SCHEDULE IN EFFECT JUNE 4th., 1911.

Trains leave Gettysburg DAILY EXCEPT SUNDAY, as follows:

8:07 a. m., for Baltimore, Hanover and York, and all intermediate points.

10:08 a. m., for Fairfield, Pen Mar, Hagerstown, Waynesboro, Chambersburg, Hancock, Cumberland, Elkins and all points westward.

1 p. m., for New Oxford, Hanover, York and all intermediate points.

3:20 p. m., for Baltimore, Hanover, York and all intermediate points.

6:40 p. m., for B. & H. Division Points to Hagerstown, Hagerstown, Waynesboro, Chambersburg, Shippensburg and Hancock, and 7:00 p. m., for Baltimore, York, Hanover and also B. & H. Division Points.

Sundays Only

Sunday Train from York for Pen Mar leaves Gettysburg at 8:55.

7:00 p. m., for New Oxford, Hanover and intermediate points, also Baltimore.

7:22 p. m., local train to York.

THEY ALL HATE IT.

Aversion to Housework Is Fundamental With Woman.

THE MODISH GAME OF "RUM."

New Ways With Asparagus—As a Salad and Baked It's Delicious—The Quaint Eighteenth Century Poke Bonnet Is Charming.

My Dear Elsa—The masculine mind is a funny piece of mechanism—don't you think so, Elsa? Last night Dick and myself were gossiping about the new wife of a business friend of his, which lady he condemned as unfeminine because she did not take kindly to housework.

There seems to be one unshakable conviction in the masculine mind that every woman ought to love housework. As a matter of fact, we know a lot of them simply loathe it. Every woman, though, cherishes in her heart the ideal of a home of her own, but what the mere man does not know is that coupled with that ideal exists another—the ideal of a competent, reliable servant to do all the rough work at least.

Wasting her time is what the modern girl considers the domestic proposition amounts to. She may do it, and do it well, but she does it with mental reservations of sliding out of it at the first opportunity. It has been my experience of the question that in women in every social stratum, from the woman who discharges a retinue of servants so that she may move to a family hotel down to the factory girl on starvation wages who would sooner die than go out to domestic service, that dislike of housework is a fundamental trait.

Now, to my mind the crux of the situation is that what the average young man expects and needs in a wife is not a gracious lady to superintend the work of others, but one who will do it

game, was started. Don't get excited over the gayety of the name, for the play itself is temperate in every way. It consists chiefly of following suit and discarding. Any number can play it who know one suit from another. There are various rules for playing this popular game, but the chief object is to get rid of the cards in the hand as quickly as possible, as all left when the first player is out are added to his score. This description is not illuminating, I admit, but there are printed rules for playing that you can get if you are interested in the game. But do not be prejudiced with the name, Dorothy D., who is a devotee of bridge, calls "rum" "an idiot's card possibility."

Now let's talk about some new ways to cook asparagus. Baked it is as nice as it is unusual. To prepare it in this style cook the stalks tender and put layers of the vegetable in the bottom of a baking dish, cover with creamed sauce and a sprinkling of seasoned bread crumbs, then another layer of the vegetable and crumbs until the dish is filled. Dot with butter and brown in a hot oven.

Asparagus salad is also delicious. Cook the stalks early in the day and put them on the ice until very cold, and marinate a half hour before serving in a French dressing which is beaten to an emulsion. If plenty of paprika is mixed with the dressing it improves the appearance of the salad. Even when mayonnaise is used the stalks should be marinated first in French dressing. Served cold this salad appeals to one's palate when the thermometer is away up in the impossible numbers for comfort.

To skip back to fashion before closing this rambling epistle, let me advise you to get one of the new-old eighteenth century poke bonnets. They are especially designed for piquant faces such as you are fortunate enough to possess. A charming model for dressy wear is made of point d'esprit net, the tall crown wreathed between the puffings with trailing vines of green leaves and tiny rosebuds. Such a creation will be lovely to wear with your thin tub frocks. Write very soon and tell me whether you like any of my suggestions. What think you of my new automobile costume?

Always yours to command for ideas,
MABEL.

SOFA CUSHIONS.

The New Ones Are Made Without Any Decoration.

The new sofa cushion is covered with the finest of lingerie material without any decoration in the way of embroidery. The edges are flat and hemstitched and made of a double fold of the muslin or lawn, while the cushion part is arranged with a series of slits measuring about three inches long, through which soft liberty satin is drawn.

The ends of the ribbon are tied at two of the corners in huge bows. Pink in rose petal shade, sky and pale blues, light green and mauve are the colors chosen for the ribbons, and it is correct to have the cushion covered with satin in the same shade as the ribbons before the lingerie cover is slipped on.

Bedroom cushions are also made in the same way, and the ottoman, which is most useful as a receptacle for blouses, etc., as well as a resting place, is covered to match the cushion, first with delicately colored silk on satin and then with the ribbon threaded muslin.

A Cheering Gift.
As a gift for an elderly or invalid friend make a fancy bag of linen or silk and embroider on it "Take One Each Day." Then on slips of pretty colored paper write quotations from the Bible, favorite verses, gems from favorite authors, etc. Fold each quotation to look like the doctor's powders and place in the little bag, which can be finished off with pretty ribbons to hang on the invalid's chair or bed. Such a gift will give much pleasure to the recipient with its cheering message for each day as it comes.

Making Buttonholes.
When making buttonholes always run the buttonhole twist all round the hole about one-sixteenth of an inch from the edge before beginning the actual buttonholing. This prevents it from tearing, besides serving as a guide to the depth of the stitches.

Kitchen Kinks.

Toasted crackers spread with jelly make an acceptable sweet at simple luncheons.

When polishing the stove add a little sugar or sirup to the polish, and it will not burn off so quickly.

Cups have almost entirely superseded the soup plate for purées as well as for any lighter form of soup.

When cooking a shoulder or leg of pork many people have the rind left on, cleaning it carefully before cooking.

A nice relish with fish is raw cabbage cut very fine and covered with French dressing beaten almost to an emulsion.

A spoonful of flour added to the grease in which eggs are to be fried will prevent them from sticking or breaking.

The mica windows of coal stoves can easily be cleaned with a soft cloth dipped in vinegar and water. This should be done when the stove is cold. A small pinch of carbonate of soda in the water in which cabbages are boiled preserves the color of the vegetable and lessens the unpleasant odor while cooking.

of air between the stones. A system of sieves is arranged in such a way that particles of the grain which have not been reduced sufficiently small to pass through are automatically carried back to the top of the mill and fed a second time to the stones. It is said that with this mill not only is the expense of running greatly reduced, but the output is increased.

Dissolving Glass in Water.
Every kind of glass at a sufficiently

RECIPROCITY BEFORE SENATE

Penrose Says Root Amendment Will be Defeated.

LONG FIGHT IS EXPECTED

Debate Began Today With Speeches In Opposition to the Bill as Reported to Senate.

Washington, June 14.—The battle lines on the Canadian reciprocity agreement were squarely drawn in the senate when, in accordance with agreement, Chairman Penrose, of the finance committee, reported the bill without recommendation. Favorable and adverse views were presented by senators and the way was cleared for the long siege of discussion in open session.

Messrs. McCumber and LaFollette submitted Reports outlining their individual views in opposition to reciprocity and Mr. Williams presented the views of himself and Messrs. Stone and Kern favorable to the measure.

The debate began today with speeches in opposition to the bill by Senators Curtis and McCumber.

Will Pass, Says Penrose.

Senator Penrose, chairman of the finance committee, said that the Root amendment to the bill would not be adopted by the senate.

"We will pass the bill without the Root amendment or any other amendment as soon as we can," said the senator, prior to the reporting of the bill.

The exchange of views on the bill was general. Mr. Dixon expressed surprise and regret that the committee had not been able to bring in a recommendation for or against the bill, and in so doing elicited a series of statements regarding the course of the finance committee. One of these was made by Senator Heyburn, who brought out the facts regarding the motion in committee to report the bill adversely. He said that he had presented this motion and that it had been lost by a vote of 7 to 7, thus rendering an opposing report impossible, while at the same time approaching very near to one.

Mr. Gore introduced an amendment to the bill which would place Canadian flour, meal, meats and agricultural implements on the free list, but said he would not press the provision if it became evident that its adoption would imperil the bill.

LaFollette's Views Adverse.

Senator LaFollette in his individual report expressed adverse views on the reciprocity bill. He said it was perfectly consistent for one who believed in free trade to support the bill, but that no man who believed either in a tariff for revenue only or in a protective tariff could consistently give it his support.

Senator John Sharp Williams, of Mississippi, declares that when he wants a thing he wants it, but he will not refuse to kill a rattlesnake because at the same time he cannot kill an anaconda. This, in brief, is his reason for accepting the reciprocity treaty as set forth in a report in the reciprocity bill.

Taking the position that the reciprocity bill should be reported to the senate with an adverse recommendation, Senator McCumber, of North Dakota, filed a minority report giving sixteen reasons why he opposed the bill. All were based on the contention that by opening the markets of the United States to Canadian farm products the proposed bill would have the effect of lowering the prices of American products.

Reciprocity Protest Hides Senator.

Washington, June 14.—When the senate convened Senator Nelson, of Minnesota, was nowhere to be seen. Some one, later, spied the top of the senator's head above a massive bulwark of paper surmounting his desk and unearthed him. Mr. Nelson indignantly denied that he was hiding and explained that the protecting screen was a protest against Canadian reciprocity signed by 39,000 Minnesota farmers. He presented it later in the day.

Release Eleven Women.

Greensburg, Pa., June 14.—Eleven women locked up in the county jail for serenading non-union miners, were released. The United Mine Workers' organization paid the fines of four, while Judge McConnell released the other seven for want of evidence. The charge against the women was that they violated a court injunction by serenading non-union miners by beating dishes.

"White Slaver" Fined \$300.

Trenton, N. J., June 14.—Judge Cross, in the United States district court, imposed a fine of \$300 upon Giovanni Albertalli, who was found guilty of violating the federal white slave law. Albertalli applied last week for a new trial, which was refused.

Aviator Falls; Breaks Skull.

Madgeburg, June 14.—Aviator Mueller, who is competing in the national German aviation contest, fell sixty feet here and sustained a fracture of the skull.

high temperature must, it appears from German experiments recently made, eventually show complete solubility in water. Under pressure glass dissolves in water heated to 410 degrees F. Sea water more than 600 feet beneath the surface will remain liquid at that temperature, and if it penetrates the earth's crust where the temperature is equally high it will, apart from the pressure, liquefy the silicates, or glassy rocks. The German experiments point to the conclusion that at a depth of

RELICS OF THE MAINE.

Fittings Recovered After Pumps Lowered Water Around Wreck.

© 1911, by American Press Association.

WORK ON MAINE THURSDAY

Pumping Will Be Resumed In Presence of Bixby.

Washington, June 14.—The pumping of water out of the cofferdam around the wreck of the battleship Maine will be resumed next Thursday. To be present when the pumping begins Brigadier General William Bixby, chief of engineers, has left Washington for Havana.

The process of clearing the water from around the wreck will take several days. The pumping will be done cautiously in order that the great dam may not become weakened. To avoid any strain the engineers will make an examination of the dam after the removal of every five feet of water.

WALL STREET AFTER \$50,000,000 LOAN

Bids Will Cover More Than Amount of Issue.

New York, June 14.—Wall street's bids for the government's new \$50,000,000 3 per cent loan are expected to cover considerably more than the amount of the issue.

Many of the big banks were busy preparing bids, and it was reported in the financial district that two or three large syndicates had been formed for the occasion. One of more bids for blocks of \$20,000,000 or \$30,000,000 each were said to be in course of preparation, while the probability that at least one bid for the whole \$50,000,000 offering would be forthcoming was indicated.

All the large bids, it is said, will take in small applications from interior banks, and several of the larger banks are expecting to handle numerous offers sent in by out-of-town correspondents in the west and south.

WOMAN MURDERED IN HOME

Found Strangled to Death With Towels Around Her Throat.

White Plains, N. Y., June 14.—Mrs. William W. Simmons, aged twenty-six years, wife of an engineer on the Harlem railroad, was found strangled to death at her home here by a neighbor.

Two towels were found tied about the dead woman's neck, both of which were double knotted at the back, showing that the murderer had meant to make no mistake.

The woman's husband at the time she met her death was on a trip. Two daughters of Mrs. Simmons, aged four and six years, slept in an adjoining room while the murderer strangled their mother.

SUES TOBACCO TRUST

Seeks to Recover \$1,200,000 Damages Under Anti-Trust Law.

Raleigh, N. C., June 14.—The hearing in the federal court before Judge H. G. Conlon, of the case of the Ware Kramer Tobacco company, of Norfolk, Va., against the American Tobacco company and others, for \$1,200,000 damages, under the Sherman anti-trust law, was begun here.

Third Rail Kills Woman.

Atlantic City, June 14.—An unidentified woman was killed by the third rail of the West Jersey and Seashore railroad three miles out from this city. The body was horribly burned and was found lying beside the tracks by railroad men, who were dispatched to the scene when a party of motorists reported seeing the woman go to her death.

Indorse Parcels Post.

Hartford, Conn., June 14.—The Connecticut house of representatives passed a resolution requesting the Connecticut senators and representatives in congress to favor a parcels post act in line with the Sulzer bill.

about five miles silicates in contact with water are virtually fluid and that the level of aqueous fusion in the earth is five times nearer the surface than is that of igneous fusion.

Holland's New Patent Law.

The parliament of the Netherlands has adopted a bill granting state protection to foreign patents on payment of a small fee.

KNOX TO EXPLAIN \$5000 PAYMENT

Probers Want to Know Why Money Was Paid to Hale.

MISSING VOUCHER FOUND

Paper Drawn In Payment For Portrait Found on Floor in State Department.

Washington, June 14.—A subpoena for Secretary of State Knox to appear and explain the payment to Frederick Hale, son of former Senator Eugene Hale, of \$5000 from the Canadian boundary fund of the state department, was issued by the committee on expenditures in the state department.

The money is said to have been paid on the sole authority of Mr. Knox's approval on a piece of paper attached to an unsigned voucher.

The disclosure as to the Hale payment was only one of a series of surprises before the committee. Thomas Morrison, disbursing clerk of the state department, declared that the voucher for \$2450 drawn in payment of a portrait of former Secretary Elihu Root, of which the artist, Albert R. W. Thal, of Philadelphia, received on \$850, had been found by a maid on the floor of his office.

How it got there he said he knew, but it was his impression that some one interested in the matter was responsible. The voucher, as found, appeared complete, Mr. Morrison declared, and contained the name of the clerk, Michael's, explanation of the \$1600 difference had been suspended.

Mr. Morrison asserted that when the voucher disappeared from the files he had no such explanation upon it. The explanation was not made public. It has been contended that the \$600 was spent in secret service work.

In regard to the Hale payment, Mr. Morrison said that all he knew about it was his direction from Secretary Knox to pay over the \$5000.

O. H. Tittman, Canadian boundary commissioner, called before the committee, declared that the \$5000 payment to Hale had never been explained to him. He said his original estimate for an appropriation of \$20,000 had been increased to \$25,000 by the state department, without his knowledge, and that he later learned the extra \$5000 had been paid to Hale.

The subpoena served on Secretary Knox is returnable today.

E. C. STOKES' MOTHER DEAD

Wireless Calls Fail to Reach Ex-Governor of New Jersey.

Millville, N. J., June 14.—With former Governor Edward C. Stokes, accompanied by his father, on the ocean, on the way to England to witness the coronation of King George and Dr. Howard K. Stokes, his brother, and other members of the family trying to reach them by wireless, Mrs. Mathilda Stokes, his mother, to whom he had so long been devoted and upon whom he lavished so constant attention regardless of public or private affairs, died at her home in Millville.

Mrs. Stokes' last words were a prayer for her son, to whom she was especially attached because of his tender care in his declining years. During all of his public career he made a point of going to Millville each week end and spend Sunday with his mother, and when she was ill he went there much oftener.

It had been planned in the event of getting in touch with Mr. Stokes by wireless to arrange if possible for his transfer at sea to a ship bound for this country. This plan it will not be necessary to countermand, as the wireless failed to get a reply from the former governor's vessel.

Bolt May Have Been After Champ.

Washington, June 14.—What is believed by scientists in politics to have been a bolt of presidential lightning hunting around to strike Champ Clark fell upon the flagstaff of the house of face building. It broke the pole about a third of the way from the top and struck down the flag. Splinters were thrown about, and many which struck the ground were picked up by people as souvenirs. The flag was rescued.

Killed by Explosion.

Albany, N. Y., June 14.—One man is dead and three are in a hospital seriously injured as the result of an explosion in the distilling room in the Albany Chemical works on Van Rensselaer Island. The money loss is \$100,000. The dead man is Frank F. Adams, superintendent of the works.

Lightning Strikes Corpse.

Yonkers, N. Y., June 14.—Lightning struck the bier of Carsten Stemmermann, in his home at Stony Point, blackened his corpse and set fire to the house, which was burned to the ground. His two nieces dragged the body from the burning building.

Salt Water For Dust Problem.

Salt water for sprinkling streets has been found to be a good cure for the dust nuisance.

A Great Sacrifice

S. S. W. Hammers, will sacrifice the following new goods, never used.

One \$60 new Weaver organ, Walnut \$20 spot cash. 50 new fancy chairs, of Munster, Gettysburg, at \$1, we will let them go at 50 cents each. 50 new 8 ft. white pine benches, worth \$1 each, can go at 50 cents each. 150 bushels granulated corn for small and large chickens, 80 cts per bushel. 75 bushels good oats at 45 cents per bushel. Pure corn meal chop, no color. \$1.35 per hundred pounds. Some nice lard used once, at half price. We must sacrifice these new goods. We have no room for them.

Will water harm it?
No! Then Ivory Soap will not.
That is the safe rule for the best cleansing of everything that is washable.
It applies to the hands, face and body; to fine furniture, laces, embroidered articles, curtains and a hundred other things.
Ivory Soap . . 99⁴/₁₀₀ Per Cent. Pure

INDEPENDENT REFINERS Makers of "Waverly" Gasolines

CIRCUS ON MONDAY

The Frank A. Robbins' circus will exhibit in Gettysburg Monday, June 29.

The headliners this year are the Hooam family, whose riding is far above the average bareback act, one double carrying feature being especially good. Charles A. Diamond does a fine flying trapeze act, which has won him commendation with some of the biggest shows in the country. The Morey brothers, in a Japanese balancing and tossing performance; the Aerial Hutchinsons, with a fine double trapeze performance; Mlle. Jeanette; Bemis and Bemis, LaBelle Daisy, Gleason, the rube clown, are others whose performance is worthy of mention, while there are innumerable attractions in the show which lengthen the program out to a full two hours. Prof. Carmelena Nasella's Italian Band of twenty-four pieces, gives a concert before each performance. There are three bands with the show. James Burns, who has one of the finest tight and slack wire acts, in which he rides a bicycle, jumps into a barrel and does other difficult feats, gives a performance which is in itself well worth the price of admission.

DAMAGE CAN BE REPAIRED

Early reports of the damage done by Saturday's storm at the Williams' Grove picnic grounds were exaggerated. While ninety trees were uprooted, the roots of two cottages ripped off and several pagodas, used by exhibitors during the annual Grangers' picnic, were badly damaged, the grounds will be in shape for this season's exposition.

The orchards between Mechanicsburg and the Grove, as well as in other sections of Cumberland county have been badly damaged by the storm, in several instances as many as twenty trees in a single orchard being put out of commission.

NEW FACTORY

F. X. Weaver, of McSherrystown, has started the erection of a two story brick factory building, 40 by 80 feet in that town to be occupied by the Penn Box Company which will be removed from Midway as soon as the new factory is completed. The erection of a larger building became necessary on account of increasing business.

STRUCK NEW HOUSE

On Sunday evening lightning struck the new two story frame dwelling house in Brunshtown, just completed by Paul Kahu, shattering the slate roof and damaging the porch. The building which was unoccupied was covered by insurance in the Adams County Mutual Insurance Company.

RE-ELECTED

At a meeting of the McSherrystown School Board, Miss Bernardina Corrigan was re-elected principal at a salary of \$70 per month, and Miss Helen Neely, of Fairfield, assistant, at \$50 per month, for the term of nine months.

TIPS OF FINGERS CUT OFF

Charles Myers, of Brunshtown, employed in the Hanover Heel and Innersole factory, had the ends of three fingers of his left hand cut off by coming in contact with a plate drier Monday afternoon.

FARM SOLD

Hunk and Peckman have sold the Richard Ball farm of 58 acres in Cumberland township to John F. Stevens, of Butler township, who will take possession April 1, 1912.

WRECK AT STARNERS

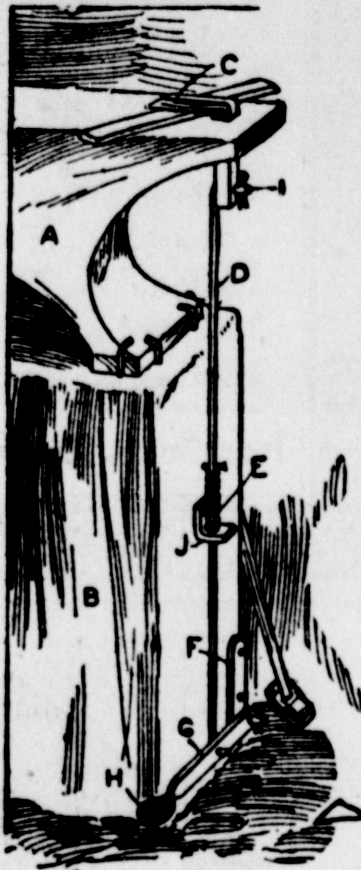

The morning train over the Reading road, due in Gettysburg at 10.45, was "sideswiped" by a freight at Starners, causing it to be three quarters of an hour late. No one was hurt.

AIDS THE BLACKSMITH.

Mechanical Helper Holds Work on the Anvil.

The device illustrated herewith is designed to take the place of the human helper at the anvil in many a job ordinarily requiring two men.

Forge an angle piece, C, to fit snugly but not tightly into the hole of the anvil A. In one end of this angle drill a hole to take the bent over end of the rod D and secure this end by cotter pin I. On the front face of the anvil block B secure the guide piece J for the rod on which, just above J, is placed the compression spring K.

DEVICE TO HELP BLACKSMITHS.

which is held to place by the cotter pin above it. The lower end of rod D extends to within a few inches of the floor and is bent at right angles to pass through the hole in the foot treadle G, the step of which is shown at H.

The action is simple. The spring E normally holds the gripping piece C well above the anvil face. The piece to be held is placed in position under C, and foot pressure on H causes C to grip the work as tightly as may be required. Releasing H causes spring E to press up rod D and release C from the work.

We can make the world a little better each day we live in it if we only work at it.

"RUSHING THE CAN."

How Edison Park, Chicago, Gets Rid of Her Tinware.

Edison Park, Chicago, Ill.—modest, retiring and always discreet—shocked all her sister parks on the northwest side by "rushing the can." Park Ridge, Irving Park, Jefferson Park, the very nearest neighbors, simply sat back and gaped at the mere vulgar suggestion.

But when they saw how Edison Park was "rushing the cans"—rushing them out of town into the desolate places of the Des Plaines river—they sat back in their chairs and clapped their hands gleefully.

Good Water Our Greatest Need.

It needs no apology to say that one of the greatest needs of any community is a supply of good water—not merely a supply of water, but water that is clean and attractive for drinking and personal use; water that is not only free from the germs of disease, but is beyond the danger of such germs being present; water that is "pure and wholesome," as the courts say, and for which freedom from pollution is a first requisite.

A Puzzle.

"That is a puzzle," said Robert W. Chambers, the novelist, at a dinner. "Yes, that is as much of a puzzle as Mrs. Malaprop's definition of naïveté."

"Mrs. Malaprop and a gentleman were discussing the beautiful young lady poet."

"What I regard as the most conspicuous thing about her is her naïveté."

"Yes," said Mrs. Malaprop. "I wonder what made her get such a tight one!"—Human Life.

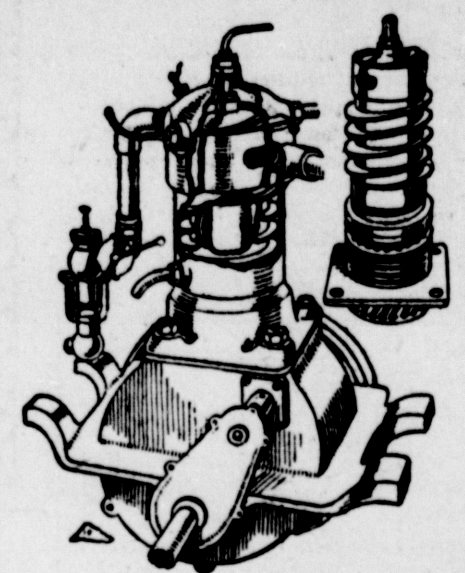

NOVEL TYPE OF ENGINE.

Revolving Cylinder Operates Inlet, Exhaust and Circulator.

An explosion engine with an axially revolving cylinder that constitutes, among other things, its own inlet and exhaust valves, reversing gear and water pump is the remarkable invention of an English engineer, says Popular Mechanics.

The two views given herewith show the main features of the engine. The larger drawing in the accompanying illustration is an external view with part of the water jacket casing and cylinder broken away to show the interior parts. The smaller drawing shows the revolving cylinder.

The cylinder is rotated at one quarter of the engine speed by worm gear.

CYLINDER VALVE ENGINE.

ing. Inside the head of the external casing are four ports, arranged opposite each other in pairs. The ports work with a pair of diametrically opposite ports in the cylinder head, one of which is shown in both illustrations. These ports comprise the valves when working against each other, both for inlet and exhaust.

The revolution of the cylinder, besides causing inlet and exhaust and circulating the cooling water, also automatically laps the piston rings and grinds the valves, thus keeping the bearing parts perfectly true. Reversing can be accomplished by casting in extra ports and fitting a valve to allow either set of port openings to be used for forward or backward running respectively.

This engine has been called a "cylinder valve" engine to distinguish it from other types.

Peculiar Properties of Bronze.

It was demonstrated several years ago at McGill university that bronze chips could be welded together cold by heavy pressure, say the Engineer. The experiment showed that the bronze flowed under pressure like water and that the molecules of adjacent pieces coalesced the same as lead when subjected to a much less pressure. This interesting fact has an unpleasant side, as several machine tool builders have discovered. It had become a common practice to bush working parts with a certain bronze, these bushings being forced into the holes with considerable pressure. When the bearing parts were immediately put to use little or no trouble was experienced, but when laid away in the stock room for some months the bronze bearings were likely to seize the shafts and make retitting necessary. The cause is that the bronze flows inward under the pressure of the cast iron part holding it and reduces the shaft clearance to zero. This has happened often, of course, where the allowed limits of clearance have been narrow, a change of bore diameter of one-thousandth of an inch perhaps being sufficient to cause trouble.

Cutting a Carboy.

The method of breaking small bottles or vessels at the place wanted with a kerosene soaked string is well known, but this method does not work so well with the larger vessels. The following is a method given by a contemporary by which any sized glass vessels can be broken—as, for example, a glass tub to be made out of a carboy. Fill the vessel with cold water up to the point at which it is to be broken. Pour enough boiling oil over the water to make a good coat on the surface and before the oil has time to cool dash cold water on the outside of the vessel. A clean break at the contact point of oil and water is said to result.

Discoloration of Wood.

All wood becomes discolored in the air, and the action penetrates throughout the mass, though at an exceedingly slow rate. Often the surface soon shows a marked change, which is always due to the action of oxygen, in combination with light, heat and moisture, upon the less stable ingredients of the wood or sap. Dust, especially if it contains iron and fungi and bacteria, may also contribute to this coloration. The effect of light is purely superficial.

A Valuable Steel Hardener.

Chromite, or chrome iron ore, is extensively employed in making special steels, either alone or in combination with tungsten, manganese, nickel or other steel hardening metal. It is also used for lining copper, lead, steel and other furnaces where the corrosive action is very great and in the manufacture of oxides and metal chromates prepared for use as pigments and dyes and of alkaline bicarbonates for use as mordants and as tannages.

Commissioner Clark to Wed.

Washington, June 14.—Interstate Commerce Commissioner Edward E. Clarke will be married June 28 to Miss Agnes Barnes, of Selma, Ala., a census bureau employee.

Electrical Life Buoy.

A new type of life buoy, intended for use at night in harbors and elsewhere, has recently been invented in England. It carries four electric lights of nine candlepower each, two above and two below the water when it is afloat, which serve as guides both for the swimmer who is seeking the buoy and for rescuers going to his aid. The light is supplied by two float primary batteries, which are sealed in such a way that they do not begin to operate

Among the Mexican Revolutionists

By EDWIN V. CHASE

Copyright by American Press Association, 1911.

Mexico being in the throes of revolution, I was sent down there on secret service duty for the United States government. In order that I might be properly armed with an introduction to whomsoever I needed to consult I was given a letter addressed "To whom it may concern" stating that I was an official of the United States sent to Mexico to gather information on the political condition of the country that would serve as a basis for any action the government might take in the premises.

Since an American was liable to be hated and suspected, especially by the revolutionists, I had no desire to fall into their hands with such a document on my person. I had asked to have it written on thin paper and occupying no great space in order that I might the better conceal it in case of necessity. I thought over many places of keeping it, but finally decided to put it in one of the little chest pockets of my waistcoat.

I entered the state or province of Chihuahua, which was in the hands of the revolutionists, pretending to favor their cause. After learning all I could in this district I entered the next on the east, Coahuila, which I found neither in the possession of the Mexican government nor the rebels, but in a state of anarchy. Falling into the hands of a small band of insurgents, I was arrested as an American resident and spy. I managed to save my neck by confessing that I was in the secret service not of the United States government, but of Madero. This secured me excellent treatment, and I was suffered to depart for Nuevo Leon, the next eastern province and in the hands of the Diaz forces. In this province is Monterrey, where the battle of that name was fought during our war with Mexico.

At Monterrey I presented my letter to whomsoever I thought would aid me and received information that was at least reliable. From Monterrey, moving southward, I entered San Luis Potosi, in the same state of disorder as Coahuila. Here I was in constant dread of being known or considered as a spy of the United States government by roving bands of insurgents.

Entering the house of a leader of one of these bands, I found it necessary to pretend to be an ardent rebel sympathizer. This pleased Signor Molina, in whose house I was, and he treated me royally till along came a man whom I had met in Monterrey. This man was a rebel and evidently remembered me and that I was, when he first met me, consorting with the Diaz people.

Outwardly Molina did not change his treatment of me except to be more scrupulously polite, but I knew I was under suspicion, and this in a province where there was no law was dangerous. At any rate, I felt that if the letter I bore were found I would be treated as a spy on the revolutionary forces and according to the fancy of those in whose hands I happened to be.

I told Molina that I thought I would go on, but he invited me to remain longer with him in such pressing terms that I knew he would not suffer me to depart without being better satisfied concerning me. I began to consider myself in great danger. If the letter I carried were found on me I would surely be considered as a spy on the movements of the revolutionists.

I tried to get rid of Molina long enough to destroy it, but he would not suffer me to go out of his sight. Not caring to let him see that I understood his purpose, I made no opposition to his keeping me with him.

Realizing that I was in for a serious business, I concluded to play a bold game. I began to tell my jailer host real or imaginary happenings to convince him that I was not only a sympathizer with the revolution, but was engaged in secret service work for the revolutionists. Such information as I could give him without breach of confidence concerning the government forces I told him as a great secret. The ruse evidently had no effect upon him.

Indeed, it seemed to make him all the more suspicious of me. At last, throwing off all disguise, he looked me steadily in the eye and said: "Who you are I don't know, except that you are an American, and the Americans who live here we hate. One thing I know—you have been at Monterrey hand in glove with the Diaz forces."

I laughed outright. "Of course I have been hand in glove with them. Why should I not have been? How can I get their secrets without first gaining their confidence? Come, Signor Molina, let us have a smoke."

Producing a cigar, I handed it to him. He accepted it, and for the moment I had restored confidence. "Have you a match?" I asked. He had not a match. If he had I should have been shot for a spy.

I arose from my chair and looked about for a light. It was the spring season, and since a nother was blowing the room was warmed by a stove. Going to it, I opened the door, fumbled in my pockets for a bit of paper, took out my letter, twisted it, touched it to a flame and lit my cigar with it.

I was just in time. Half an hour later I was searched for incriminating papers. None were found, and I went free.

Until the buoy is lifted from its rack to be thrown overboard. The lights burn for three or four hours continuously.

Cartridge Making Machine.

According to a Paris Journal, Captain Von Henrichs of the Austrian artillery has built a wonderful apparatus for making cartridges. It suffices to introduce the powder, bullets and cases—the machine does the rest. The cartridges come out ready for use, the

IN THE WORLD OF SPORT

Pitcher McIntire, Who Challenges All Fungo Hitters.

Photo by American Press Association.

Harry McIntire, the Cuba's crack right hand twirler, is out with a challenge to any fungo hitter in captivity. Mac has studied the fine art of long distance hitting for more than ten years and claims his record wallop traveled 475 feet. He is more than anxious to try his skill in this line with the bat against "Big Mike" Mitchell of the Cincinnati Reds. The latter holds the championship of the country, having topped a number of fungo hitters during a field meet at League park, in Cincinnati, two seasons ago, when he walloped the pill 415 feet from deep right field into home plate. McIntire says he can outdo Mike now in this line.

Weight Problem Bothers Pugilists.

Taking off weight in order to make the beam tip at a certain notch has long been one of the hardest tasks undertaken by pugilists in training. There is so much at stake in modern glove contests that first class boxers generally stick close to their weight limits rather than concede avoirdupois to challengers who cannot reduce. The dispute between Paddy McFarland, the great Chicago lightweight, and Freddie Welsh of England is a case in point. Probably the best boxers in this class, they have been wrangling over a difference of two pounds. McFarland has insisted upon 135, weighing seven hours before entering the ring, while Welsh has demanded 133 eight hours before the handshake. Mutual friends have tried to induce them to agree upon a compromise to no purpose, the men being so bitterly personal in their feelings that arbitration has been impossible.

No Spaghetti In Jim Flynn.

Jim Flynn, the Pueblo freeman and shatterer of "white man's hopes," is not an Italian, as has been generally understood, but an American born of Irish and German parents. The mix-up came about through his stepfather being an Italian, his name being Chiariglioni. Jim wishes to have the mistake corrected and states that his mother gave out the name of Chiariglioni when his record was first given to the public, and it has stuck ever since. His stepbrother is part Italian. Jim went to Milwaukee after his Kansas City victory, and the first thing he heard after emerging from the Schlitz hotel upon being introduced to a young man was "Why, you don't look like an Italian." "No, I am not an Italian," said Jim, "but from good old Irish and German stock."

Hawaiian Swimmers Coming.

A team of Hawaiian swimmers are coming to America in July—that is, if they are satisfied they are good enough to have a chance with the Americans. For the purpose of finding out the real merits of the Hawaiians an aquatic meet is to be held at Honolulu June 11. This is to be a record meet, and if the records are at all respectable the men will be sent to the Pacific coast. G. S. Tuttle, president of the Hawaiian association, has appointed a committee which will look after the record meet. The rules of the A. A. U. will be enforced in Hawaii after June 1.

Callahan Praises Ping Bodie.

Jimmy Callahan of the White Sox was telling about Ping Bodie, the sensational slugger of Duffy's team. "This lad is a real true hitter," said Jimmy.

"He is short and stout and will get too fat if he does not take the best care of himself, but he can sting that pill. He chokes his bat and swings from the waist, getting an enormous amount of force into his blows. His eye is very keen, and he seldom hits at a bad ball. I look to see him hold his job and should not be surprised to see him right at the top of the sluggers in the American league at the end of the season."

Imperfect ones being thrown aside. Three men can manufacture 1,500 cartridges in three minutes with the apparatus.

Alcohol In Peat.

In European experiments a ton of dried peat has been made to yield forty-three gallons of alcohol when treated with sulphuric acid and yeast. As a commercial alcohol it costs about one-fourth that produced from potatoes. Tar is another product of peat.

SUMMER SUITS

An attractive line of Spring and Summer Suits, in many Shades and Styles. A Suit for every man, young man or boy at prices to suit all. Our Stock this season is larger than ever before because, with our enlarged store room, we can carry more clothing as well as more furnishings.

Washable Suits for Boys
in many Styles and at low prices.

The Fellowcraft and Ralston Shoes

for Men in a large variety of Styles.
Other Shoes for Men, Women and Children.

O. H. LESTZ,

Corner Centre Square and Carlisle Street.
Store Open Evenings.

Stop Look Listen

The Chautauqua Demands You.
You Need It and Your Children
Need It and Your Town Needs It.

The merchant, professional man, banker, or member of any other calling, the retired farmer, the fathers, the mothers, the students, the farmers, any or all classes that cannot see the great benefit to a community of such an entertainment for ten days, looks at things from a badly warped point of vision.

It's the best summer school course offered in the world. The information gained there, the inspiration received from those who have done things, the opportunity to see and hear men and women of note, all these things are worth to the growing boy or girl ten times—yes, many times the price of a ticket.

G.W. Weaver & Son

The Leaders

JUNE

The Month for Shirt Waist
and
Lingerie Dress Selling

Our stock is very complete, owing to the fact that new stock is coming in every week.

Our Waists and Dresses

with a few exceptions, are all from the celebrated Waldorf and A&N Brand Factories, there are no better fitting, better made or better styles anywhere. We do not believe in comparative price values, as used in much of the present day advertising, but we are willing to put our prices against those of any other store anywhere, quality against quality.

Gettysburg, Pa.

HUMOR OF THE DAY

Poker.

A California judge has ruled that poker is not an American game.

To any man who has ever furnished the lights and the lunch, the table and the chairs, liquids and cigars for a gang of friends, and right on top of all that hospitality has been forced to provide all the money also, poker ceases to be a game and becomes a slaughter.

When guests will eat your sandwiches and raise you out of hands that you have won, isn't the California judge right? Poker isn't a game; it's a misdemeanor. When men will smoke your good cigars and remind you that you were 10 cents shy in a pot twenty minutes ago, poker isn't a game; it's grand larceny.

And on top of all this, when your guests depart, their pockets bulging with your money, instead of thanking you for your hospitality, they chuckle among themselves and remark: "Let us know when you're going to

do this again, will you? It's the oddest thing we know of."

Then you quietly put out the cat for fear she'll suffocate in the tobacco smoke downstairs if she's left indoors, turn out the lights and crawl into bed, wondering what fool ways men had of getting rid of their money before poker was invented.—Detroit Free Press.

BASEBALL POINTERS

Schmidt, Detroit's catcher, is permanently incapacitated from playing ball because of an injury to his arm received in a prizefight last fall.

In Ray Miller the Boston Nationals have one of the best hitters in the National league. He is punishing the pitchers for a .400 batting average.

Manager Clarke of Pittsburg would amend the baseball rules so players could coach their own batters from the bench. He wants to "encourage" his men.

Dode Criss, the St. Louis pitcher, is the only player in baseball who earns his salary as a pinch hitter. As emergency batter he outclasses every other player in the big league.

Pic-nic Suggestions

Just arrived, a new line of teas, consisting of Moyune Imperial, Formosa Oolong and English Breakfast. They have no superior for Iced Tea Purposes.

Conserves of White Cherries (Honey flavored), Peach, Fig, Strawberry, Red Raspberry, and our Fendell and Premier Olives and various kinds of Pickles complete a Menu for Outing Parties.

Dainty Cakes, Crackers, Cheese and potted meats of all kinds always on hand.

"WEAR-EVER" Aluminum Ware

We have had many calls for WEAR-EVER Aluminum Ware and we want to notify our customers that we now carry this in stock regularly.

SPECIAL Sale on a 3-pint Sauce Pan, only 35c, would be 70c at regular price.

If you need a new kettle for preserving try an Aluminum kettle. It may cost you a little more than a cheap Enamel kettle but will outwear three or four other kettles.

It is the best way to use on a Gas stove or New Perfection Oil Stove as the most intense heat will not injure it in the least.

Gettysb'g Department Store.
